

COST in a nutshell

Radenka Krsmanovic Whiffen – COST Association, Belgium

COST (European Cooperation in Science and Technology) funds interdisciplinary research networks called COST Actions. These Actions bring together researchers, innovators and other professionals including industry specialists, who are based in Europe and beyond, to collaborate on cutting edge research topics over a period of 4 years. The funding a COST Action receives covers the expenses related to networking activities (organising conferences, meetings, training schools, short scientific exchanges) rather than research, and as such develops and supports strong, innovative scientific networks at all career levels across the European research space.
