

Sara ALFANO – CV

Sara Alfano is a post-doctoral researcher in the LAMP group at Sapienza University of Rome. Her research activity is focused on recovery, characterization and application of microbially-produced polyesters. She received her PhD in Mathematical Models for Engineering, Electromagnetism and Nanosciences curriculum Materials Sciences at the Department of Chemistry of the University of Rome La Sapienza discussing the thesis entitled “A poly-hydroxyalkanoates (PHAs) multifaced study: extraction, characterization and applications” under the supervision of professor Andrea Martinelli.
