Albert Antonacci

Senior Failure Analysis Engineer Lead at LFoundry Srl - Physical & Failure Analysis Lab.

Degree in Electronic Engineering at Polytechnic of Bari, the province of Italy where I was born and I raised. Once graduated, I started to work in a semiconductor devices production Fab located in Avezzano, city where I currently live, as Failure Analysis Engineer. Almost 20 year working experience in that role.

Leader of a team of specialists, responsible for all the failure analysis activities to determine the causes of device ruptures and to prevent their recurrence.

I lead physical analysis execution on devices failing after Probe test and on customer return parts, by interacting directly with internal and external customers. Operating procedures creator and trainer. Laboratory projects coordinator, supporting area manager on all the Laboratory activities.

I try to have a constant commitment to perform a daily good job within my team.

My other main interest is to spend a quality time with my family, composed by my wife and my daughter, when possible by practicing outdoor sports or with friends.
