

## **Salvatore Baglio – CV**

Salvatore Baglio graduated 1990 in Electronic Engineering and received the Ph.D. in Electrical Engineering in 1994 at the University of Catania where he is now Full Professor of Electronic Instrumentation and Measurements. Prof. Baglio is Deputy Rector for Scientific Research and the President of the university micro-bio- nano facility center "Bio-nano Research and Innovation Tower" (BRIT). His scientific interests focus on "measurement systems and nonlinear dynamics", "micro-nano sensors" and "energy harvesting". He has coordinated as PI numerous research projects and has authored more than 450 scientific publications. Prof. Salvatore Baglio is Fellow of the IEEE, class of 2013, has served as AdCom member for the IEEE Instrumentation and measurement society and for the IEEE Sensor Council; he was President of the Instrumentation and Measurement Society from 2020 to 2022, being now Junior Past President. Since 2022 Prof Baglio is President of the Foundation "Sicilian Micro and Nano Technology Research and Innovation Center" (SAMOTHRACE). Innovation Ecosystem which, moving along the "fil-rouge" of micro and nano electronics, develops research, know-how and IP with an impact on the economy and the society.
