

## **Magda BLOSI - CV**

Magda Blosi, PhD in Industrial Chemistry, is a researcher at the National Research Council within the Institute of Science, Technology, and Sustainability for Ceramics (CNR-ISSMC). Her research focuses on developing eco-friendly synthesis methods for inorganic and hybrid nanoforms, applicable as catalysts, photocatalysts, and sorbents for water treatment, as well as antimicrobial or hydrophobic coatings. She has contributed to research projects on national and EU levels, also collaborating with companies. She has played key roles in over six EU- projects dealing with safe and sustainable by-design (SSbD) approaches to nanomaterials. She is a co-author of seven international patents and 80 scientific papers.
