

Marco Cirelli received his BS and MS degrees from the University of Rome Tor Vergata in 2014 and 2016 respectively. In 2020, he received his Ph.D. in design, manufacturing, and operations in engineering, working on multibody dynamics of transmission systems. From 2016 up to now, he has been working in several fields, such as multibody dynamics, compliant mechanisms, vibration dampers, structural analysis, optimization methods, 3D design methods, and virtual and augmented reality in engineering applications. In 2018, he was hired for the Adjunct Professor of Applied Mechanics position at the University of Niccolò Cusano. Since 2023, he has been a researcher at the University of Rome Tor Vergata.
