

Angelo FRENI – CV

Angelo Freni is a Research Director at CNR-ICCOM in Pisa (Italian National Research Council - Institute of Chemistry of OrganoMetallic Compounds). He holds a Ph.D. in Materials and Chemical Engineering. His expertise is in the development of energy technologies with special regard to thermally-driven heat pumps and heat storage systems. He has been the Italian representative in the Mission Innovation Challenge 7: “affordable heating and cooling of buildings”. He has been the Italian representative in the Executive Committee of the Heat Pump Program (HPP) of the International Energy Agency (IEA).
