

GERINI Giulia – CV

Dr. Giulia Gerini is a postdoctoral research fellow at Sapienza University of Rome in the Cellular Biotechnology Laboratory, led by Prof. Cinzia Marchese.

In 2023 she completed her PhD in Experimental Medicine (Cycle XXXV) at Sapienza University of Rome under the supervision of Prof. Cinzia Marchese and Prof. Simona Ceccarelli. Her research activity focuses on Adipose Stem Cells (ASC) and the setting up of innovative methods for their clinical application; in particular, great effort is put on the study of the secretome and 3D cell culture models, and to design optimization strategies to make them more efficient in a translational perspective.

In 2020, Dr. Gerini received the "Avvio alla Ricerca" grant from Sapienza University to support her research activity, and since the beginning of her PhD she has been part of PRIN projects.
