

Alice Gualerzi is Senior Researcher at the Laboratory of Nanomedicine and Clinical Biophotonics (LABION, www.labion.eu) of Fondazione Don Gnocchi. AG received her Master's degree in Biology applied to biomedical research in 2009 and her PhD degree in Morphological Sciences in 2013 at the University of Milan. In 2012 she collaborated as Junior Research Specialist at the University of California San Francisco and she was later granted by Sardegna Ricerche with a postdoctoral scholarship funded to work at BT (Biomedical Tissues) srl c/o Parco scientifico e tecnologico Polaris (Pula, CA) in the field of cardiovascular tissue engineering, regenerative medicine, and nanotoxicity. She joined LABION in 2014 where she started her research work on the biophotonic characterization of extracellular vesicles both as regenerative agents and as diagnostic and prognostic biomarkers for regenerative rehabilitation. Since 2022, she is board member of the Italian Society for Extracellular Vesicles (EVIta – www.evitasociety.org) and member of the International Society for Extracellular Vesicles (ISEV), with a role in the Rigor and Standardization subcommittee for EV research since 2018. AG is also adjunct professor at the University of Milan since 2014.
