

## **Bruna MATTURRO - CV**

Dr. Bruna Maturro graduated with honors in "Industrial and Environmental Biotechnology" in 2009 and earned a PhD in "Chemical and Industrial Processes" in 2014 from Sapienza University of Rome. She is currently a Researcher at the Water Research Institute of the National Research Council (IRSA-CNR). Her research focuses on the bioremediation of environmental matrices contaminated by toxic compounds, particularly chlorinated and non-chlorinated hydrocarbons. Her work involves studying biological processes and developing sustainable technologies for the bioremediation of contaminated environmental matrices. She has participated in several national and international research projects and she is also a member of the innovative start-up Trireme srl, established as a joint spin-off between CNR and Sapienza University of Rome.
