

Maria Anna MURMURA – CV

Maria Anna Murmura is a researcher in the disciplinary sector Principles of Chemical Engineering at the Department of Chemical Engineering of Materials and the Environment of the University of Rome "La Sapienza", where she is currently a professor of the courses of Thermodynamics for Chemical Engineering II and Green and Sustainable production of hydrogen. She obtained her PhD in 2015 with a thesis entitled "Sustainable production of hydrogen by low-temperature thermochemical cycles". Her research activity, documented by over 30 publications and conference communications, mainly concerns the modelling of chemical reactors, with particular reference to hydrogen production processes.
