

Sara Nocentini – CV

Sara Nocentini got her International Doctorate in Atomic and Molecular Photonics at the European Laboratory for Nonlinear Spectroscopy in Florence in 2017 where she had a Post-Doc Position for 2 years. Since 2019, she is a researcher at the National Institute of Metrological Research (INRiM) in Turin in the division of Advanced Materials Metrology & Life Sciences of INRiM. Her research interests and activities include smart responsive polymers for photonics, micro robotics and cryptography. She is the PI of a National and an European Project.
