

## **Assunta PELAGI - CV**

Assunta Pelagi earned her master's degree in Cognitive Psychology and Neuroscience in 2022 from the Magna Graecia University of Catanzaro. In 2023, she began her PhD in Digital Medicine at the Neuroscience Research Center of the same university.

Her current research is part of the "TECH4YOU - Technologies for Climate Change Adaptation and Quality of Life Improvement" project. She is specifically focused on developing methodologies to evaluate human well-being. This includes designing numerical scales for motor and functional assessment, as well as analyzing neuroimaging data related to activities that promote well-being.
