

## **Francesco PETRACCHINI - CV**

Eng. Francesco Petracchini is the Acting Director of the Department of Earth System Sciences and Environmental Technologies at CNR. Since 2020, he has served as the Director of the Institute for Atmospheric Pollution. His tenure at CNR-IIA began in 2003, where he has conducted research and managed projects. In 2009, he took over the management of the CNR-IIA Project Office, securing numerous national and European research projects. Since 2015, he has led the bioenergy group, focusing on national projects and consulting for private companies on bioenergy and the circular economy. Throughout his career, he has established many national and international collaborations with companies and research entities, significantly contributing to CNR-IIA's growth in the international research landscape.
