

## **Ilaria PIGLIAUTILE - CV**

Ilaria Pigliautile, Ph.D., is an Assistant Professor in Building Physics at the Engineering Department of the University of Perugia (Italy). She is passionate about the existing mutual relationship in between people and the built environment, at different scales: from deepening indoor comfort theories and occupants' behaviour affections, up to urban morphology and metabolism impact on the environment and citizens well-being. As a researcher, she is seeking for valuable solutions leading our society towards the needed green transition supporting both technology advancements and people empowerment also in the energy market by promoting energy communities, among other experiences. Graduated cum laude in Building Engineering and Architecture at University of Perugia in 2015. PhD in Energy and Sustainable Development in 2020.
