

Giuliana Prevete_CV

Giuliana Prevete was born in Benevento, 8th August 1995. She achieved a master degree in Chemistry and Technology of Drugs and at the University of Rome “La Sapienza” with 110/110 cum laude.

She holds a PhD in Pharmaceutical Sciences at the University of Rome “La Sapienza” in collaboration with the Institute for Biological Systems (ISB) of the National Research Council (CNR) of Rome, by defending a thesis entitled “Liposomes as a versatile tool for the delivery of natural antimicrobials” under the supervision of Prof. Claudio Villani and Dr. Marco Mazzonna.

Currently, Giuliana Prevete is a Postdoctoral Researcher at the Institute for Biological Systems (ISB-CNR) of the National Research Council of Rome. Her research activity is focused on the design and development of liposomes as delivery systems of bioactive compounds characterized by antioxidant and antimicrobial activity.
