

DAMIANO SPAGNUOLO - CV

Damiano Spagnuolo is an Italian marine biologist specializing in macroalgae research and sustainable biotechnology. With a PhD focused on the valorization of macroalgal biomasses, he has extensive experience in macroalgae cultivation, molecular phylogeny, and metabolite extraction. He has collaborated with various research institutions and companies, contributing to projects that align with the principles of circular economy and sustainable agriculture. Damiano has also taught applied phycology and assisted in laboratory courses at the University of Messina.
