Valeria VISTOSO – *CV*

Valeria Vistoso is an MSCA PhD Candidate in Materials Science at CNRS - IPCMS of Strasbourg. Within the framework of the GAP research project, her doctoral studies focus on multi-technique strategies for bone defects evaluation. She obtained her M.Sc. and B.Sc. in Materials and Nanotechnology Engineering from Politecnico di Milano, and her theses centred on the characterization of materials. Valeria specializes in innovative approaches to bone defect assessment using different volumetric electron microscopy techniques.
